

StorIQ

Area Manager

We are StorIQ

What we believe

We believe that stores are the future of retail. **We believe great shopping experiences are the result of every single detail being right.** We believe that when store teams are empowered and supported to get the details right, the results can be spectacular.

What we do

Our mobile optimised, cloud based software helps our customers thrive in a multichannel world. **We streamline store communications, task management, store reviews and photo uploads** – simplifying processes to save time, increase visibility of store performance and provide greater clarity for both store and head office teams.

Why we're different

We are dedicated to building products that our customers enjoy using, and which truly save time and make their jobs easier. We are a small team, but highly experienced and super smart - our deep experience in both tech and retail means **we can challenge our customers to think differently** and transform their retail operations.

Ultimately, we help our customers drive sales by improving
in store execution

StorIQ provides a complete retail ops platform; accessible on any device

Area Manager

More efficient & consistent store visits

1

Custom store review templates - with task management and reporting - enable field teams to plan visits and provide clear and structured feedback

2

Area Managers complete store visits using a purpose built iPad app, enabling them to work offline when necessary and sync to the StorIQ system when a connection is available. The app provides easy access to previous visit reports, tasks, and other documents.

3

All store reviews are held in the system, making it easy to track activity and store performance across the portfolio

Key Features

Easily set up multiple store visit templates to match your exact business requirements

Review prior visit reports, tasks, photos and store documents

Easily assign tasks from within the App whilst conducting a store review. Reviews can be done on any device.

Automatically generate a store visit report added to central database with a copy emailed to the store manager

The Benefits

CONSISTENCY

Templated reviews ensure AMs provide consistent feedback across the store portfolio.

PERFORMANCE

Detailed insight into store level operational metrics helps uncover and share best practice.

RELIABILITY

Native apps work offline, supporting users even when they're not connected to the internet.
