We are StorIQ

What we believe

We believe that stores are the future of retail. **We believe great shopping experiences are the result of every single detail being right.** We believe that when store teams are empowered and supported to get the details right, the results can be spectacular.

What we do

Our mobile optimised, cloud based software helps our customers thrive in a multichannel world. **We streamline store communications, task management, store reviews and photo uploads** – simplifying processes to save time, increase visibility of store performance and provide greater clarity for both store and head office teams.

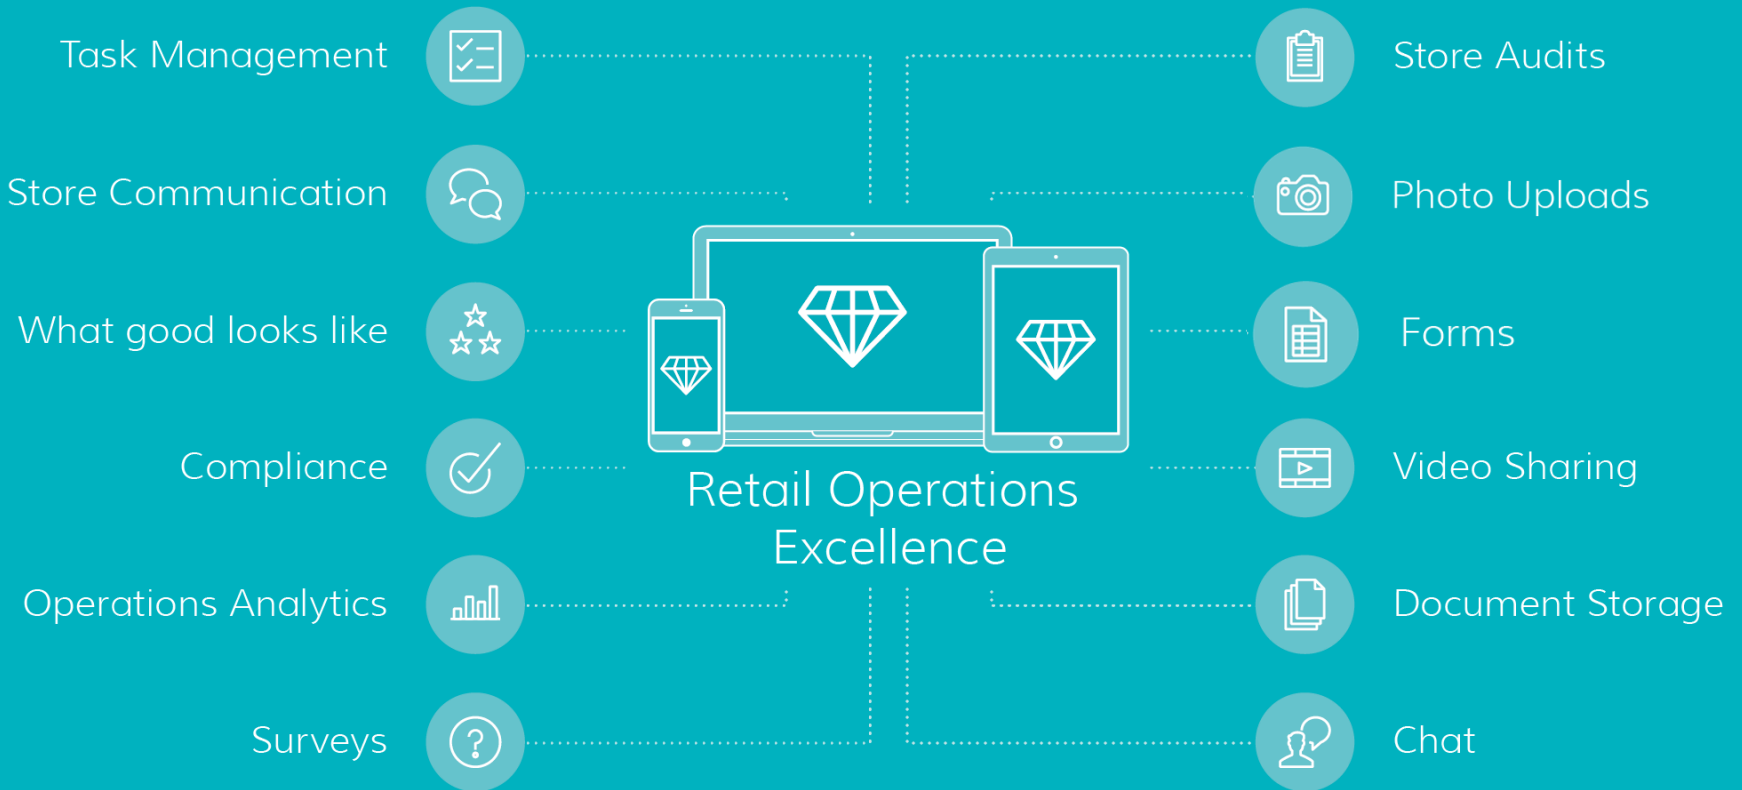

Why we're different

We are dedicated to building products that our customers enjoy using, and which truly save time and make their jobs easier. We are a small team, but highly experienced and super smart - our deep experience in both tech and retail means **we can challenge our customers to think differently** and transform their retail operations.

Ultimately, we help our customers drive sales by improving
in store execution

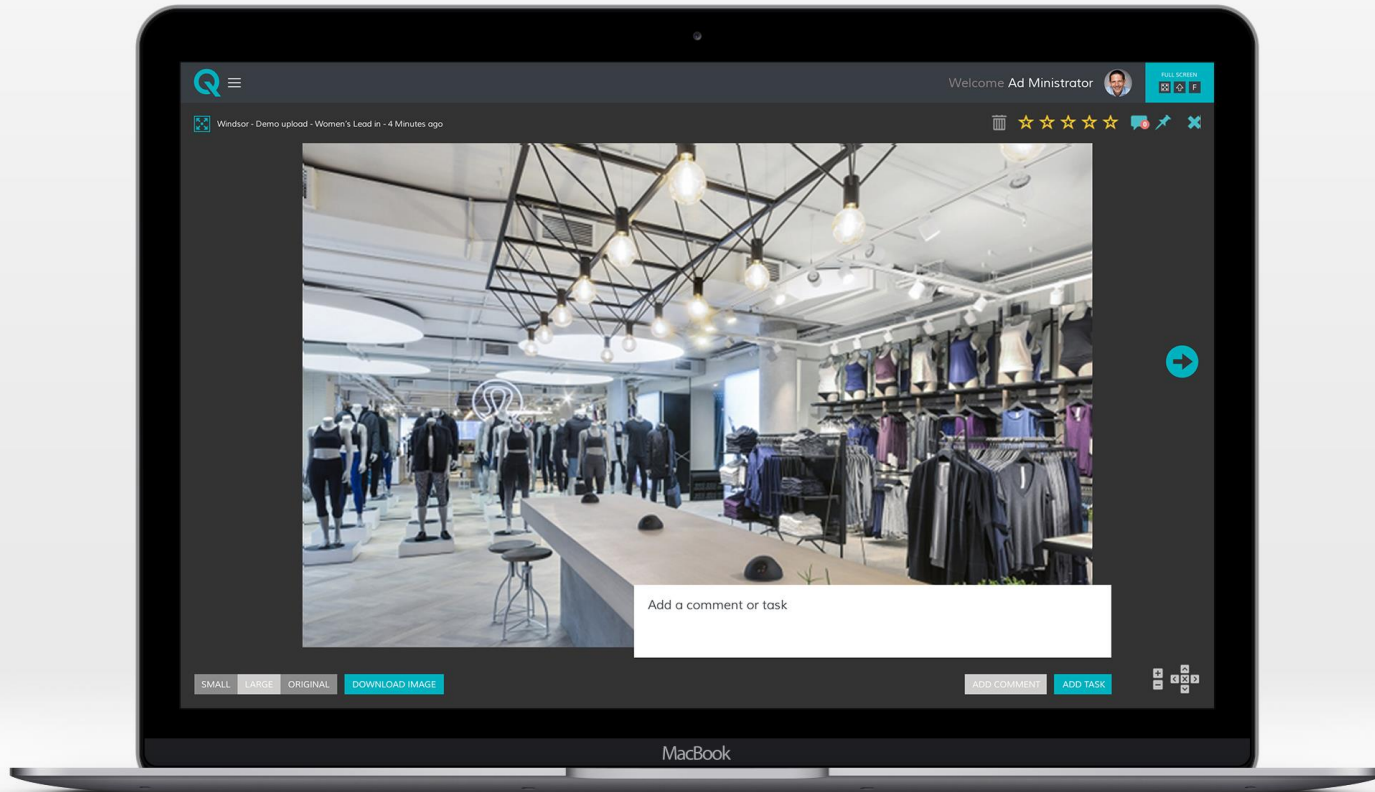

StorIQ provides a complete retail ops platform; accessible on any device

Store View

See every store, every day

1

Stores receive all campaign guidelines and associated tasks within their store dashboard.

2

Straightforward photo uploads make it easy for stores to upload photos, giving regional and head office teams instant visibility across the portfolio and enabling rapid feedback.

3

Photos are held within the StorIQ system, building a visual archive to help support best possible brand and product presentation.

Key Features

Set up multiple campaigns for stores

Assign tasks to each campaign

Select stores within a portfolio to send to

Easy image upload and organisation

Stores use own devices to upload photos

Monitor Campaign compliance

Photos immediately available for central review

Comment and assign additional tasks on photos

The Benefits

VISIBILITY

Making all stores visible online, on any device, improves understanding and breaks down barriers.

ANY DEVICE

Store View is cloud-based with a responsive web interface, so there's no need to purchase additional IT equipment.

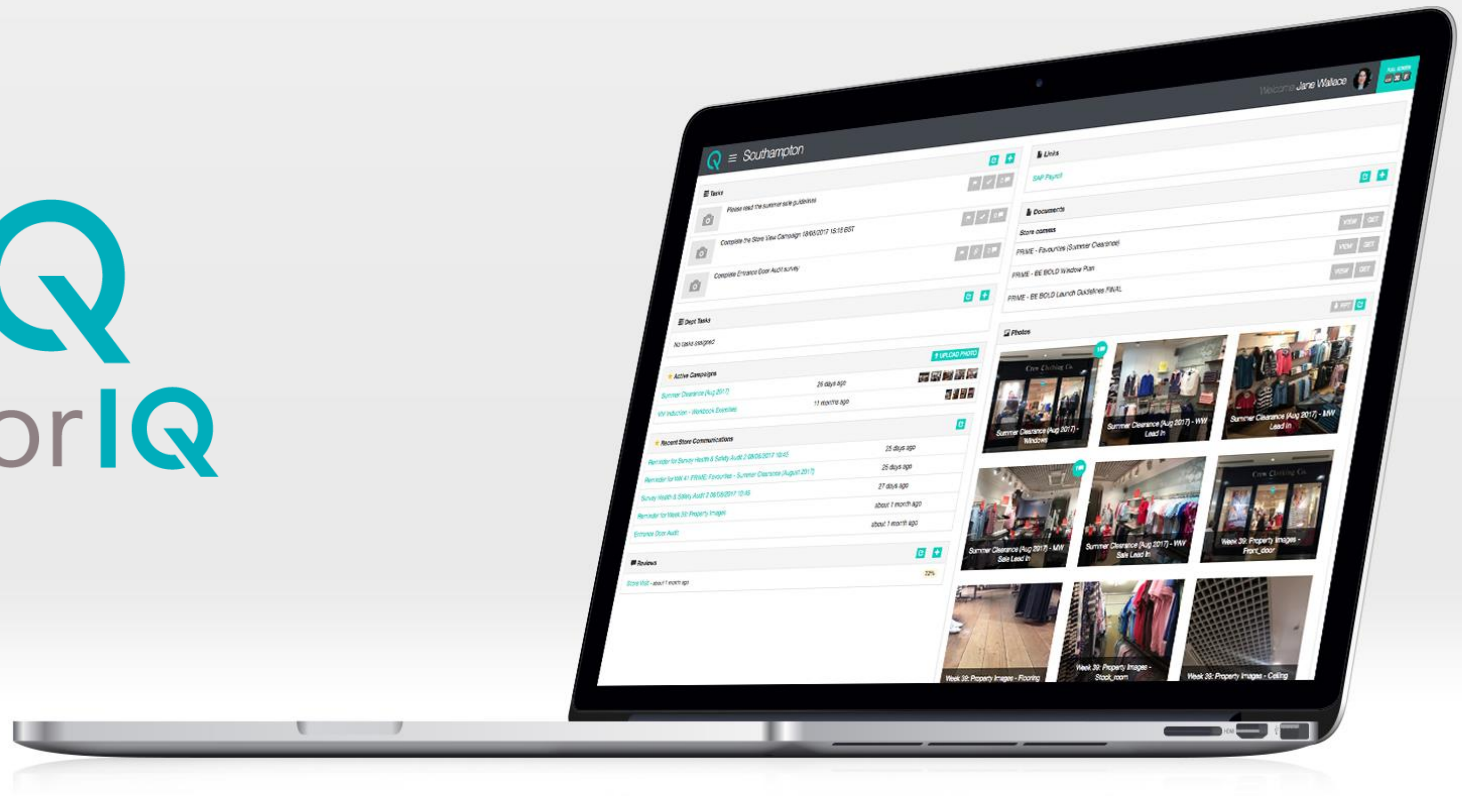

SPEED

Web-based technology creates a workflow from a photo, so feedback or a follow up is clear, fast and easy.
